SCHOOL**
STUDENT

EXPERIENCE

MINI PROJECT DEVELOPED USING VUE.JS | MY RESUME

The mini project "My Resume" is developed using Vue.js with the aim of improving my skills in Vue.js and creating custom animations.

The goals for this project are:

- Display a resume
- Backend CRUD system
- Create animations
- Learn to use Vue.js
- Write an API to connect with a database

THESIS PROJECT DEVELOPED USING LARAVEL | I LOVE TRAINING

The website focuses on supporting careers related to vocational training centers.

It has several functions:

1. Courses:
 - Users can register for courses.
 - Users can print the registration form as a PDF.
2. Course Creation:
 - Open courses for interested individuals to attend.
3. Portfolio Creation:
4. For Employers Looking to Hire:
 - Search for workers.

Technologies used include Laravel, PHP, HTML, CSS, AJAX, and MySQL as the database.

INTERNSHIP | APPSYNTH COMPANY

I have interned at Appsynth cooperation for 3 months. I learned mobile application development via React Native with Firebase
